Jifty notes for installing production Jifty instance on Debian etch

t=0x8de4068 [0,0]

/etc/apt/sources.list

```
deb http://debian.carnet.hr/debian etch main contrib non-free
deb http://security.debian.org/ etch/updates main contrib non-free
deb http://debian.jifty.org/debian etch jifty
```

packages

```
sudo apt-get install subversion make svk ssmtp jifty libmodule-install-perl
```

configuration

SMTP

Edit `/etc/ssmtp/ssmtp.conf` to include valid `mailhub`

Apply patch #24482 to `Email::Send` to fix mail sending or execute fillowing command:

```
sudo ln -sf /usr/sbin/sendmail /usr/local/bin/
```

application

```
svk co svn+ssh://llin-svn/home/dpavlin/private/svn/Arh
cd Arh
perl Makefile.PL

# sudo is needed if you don't have all modules
sudo make

./bin/jifty schema

./bin/jifty server
```
