

# bojler

```
root@bojler:/sys/class/gpio# ls
export gpio8 gpiochip0 unexport
root@bojler:/sys/class/gpio# cat /etc/rc.local
```

1. Put your custom commands here that should be executed once
2. the system init finished. By default this file does nothing.

1. USB power

```
echo 0 > /sys/class/gpio/gpio8/value
echo 1 > /sys/class/gpio/gpio8/value
dmesg | tail -3
```

```
/usr/bin/remserial -x 2 -p 23000 -s "9600 raw" /dev/ttyUSB0 &
```

```
exit 0
root@bojler:/sys/class/gpio#
```
